INTRO

I have always been fascinated by the impact of visual communication and how it can shape our perception of the world. Graphic design is not only a form of art, but also a tool for connection, conveying messages and creating impact. That is why I want to pursue a Bachelor's in Graphic Design at BSBI – Berlin School of Business and Innovation.

BSBI is an ideal choice for me because it offers a comprehensive and practical degree programme that covers all aspects of graphic design, from typography to visual corporate identity, from UI/UX design solutions to websites and digital publishing. By studying at BSBI, I will benefit from the expertise of industry professionals, the access to state-of-the-art facilities and software, and the opportunity to develop a strong portfolio of work that showcases my skills and creativity.

Moreover, BSBI is located in Hamburg, one of the most creative and multicultural cities in Europe. Hamburg is home to many renowned companies, agencies and start-ups that operate in the fields of graphic design, advertising, media and technology. By studying in Hamburg, I will be exposed to a vibrant and diverse environment that will inspire me, challenge me and expand my network. I will also have the chance to gain valuable industry experience through placements, internships and projects that will prepare me for the competitive job market.

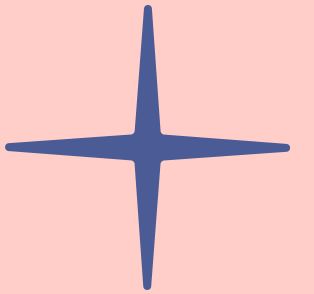

My goal is to become a creative leader who can deliver innovative and effective graphic design solutions for various clients and audiences. I believe that studying at BSBI will equip me with the knowledge, skills and confidence I need to achieve this goal. I am eager to learn from the best, collaborate with like-minded peers and explore my potential as a graphic designer.

I am confident that I have the passion, motivation and aptitude to succeed in this programme. I have a strong background in art and design, as well as experience in creating graphic design projects for personal and professional purposes.

I would be honoured to join BSBI and become part of its dynamic and diverse community of students and staff. I am ready to take on the challenges and opportunities that this programme will offer me. I look forward to hearing from you soon.

Thank you for your consideration.

CASAMIGOS

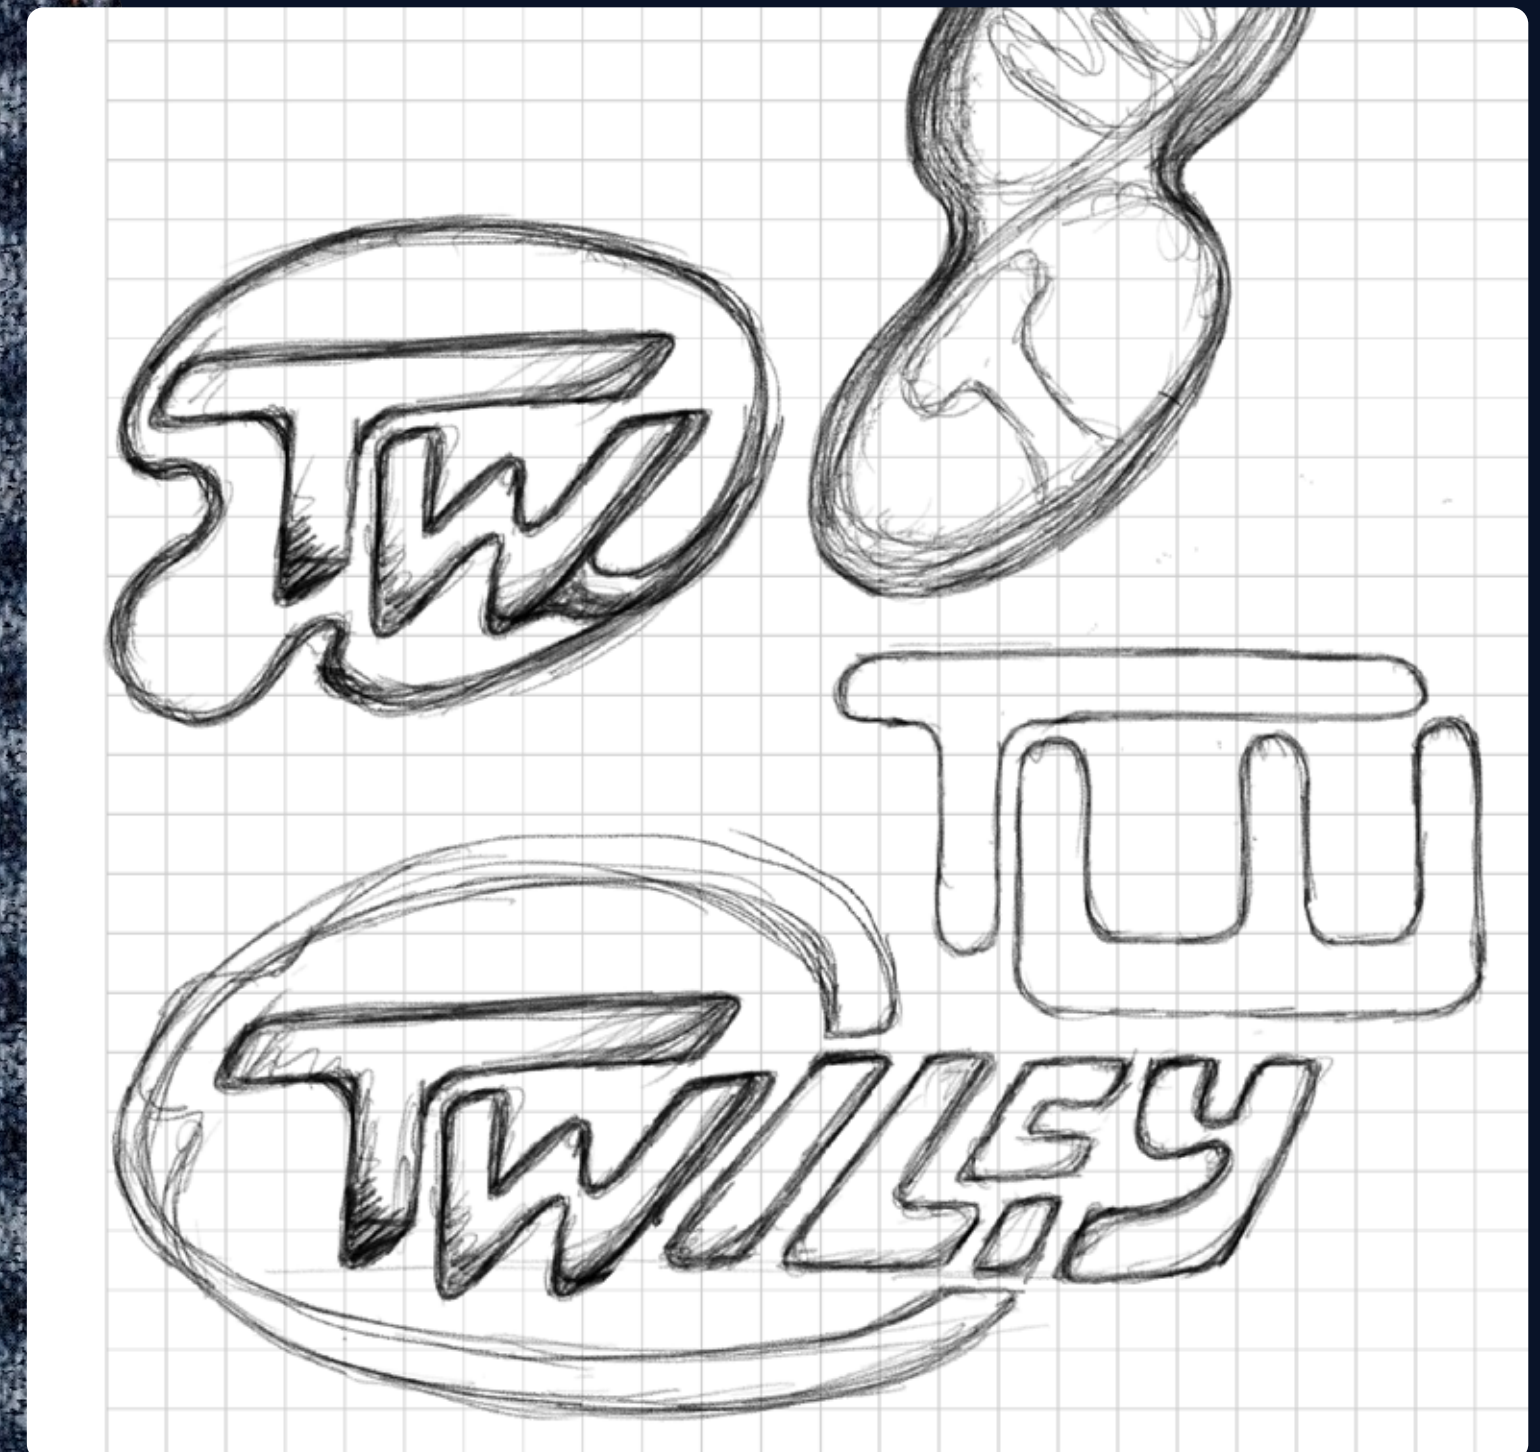

The billboard features three models in a dark studio setting. On the left, a model wears a white, long-sleeved, textured two-piece outfit. In the center, a model is seen from the back, wearing a similar white textured outfit. On the right, a model wears a two-piece outfit made of newspaper print. The entire scene is framed by a thick, wavy, metallic border that glows with a green and orange gradient. The brand name 'Tia Adeola' is written vertically in a large, stylized, metallic font on the left side of the frame.
