For my school assignment, we were tasked with creating a functional website for a celebrity without incorporating purchasing capabilities. I decided to focus on Rihanna, as she is not only an artistic inspiration but also embodies strong moral values. Given Rihanna's existing lingerie and makeup lines, it was fascinating to incorporate her work into my web design.

For our school magazine cover project, in which we had to design a magazine cover, the title "Tarantel" German for "Tarantula," served as my inspiration. I envisioned students as resilient spiders, facing unexpected obstacles throughout the school year. Just like spiders, they encounter challenges but endure. The cover symbolizes their journey through adversity, reflecting resilience and determination.

When the Youth Word of the Year 2022 was announced, we were tasked with illustrating our interpretation of the word "smash." At that time, "smash" commonly referred to expressing intense attraction towards someone on social media platforms. I chose to depict it as a screaming person to capture the excitement and passion associated with the word.

Upon solely listening to a radio advertisement, we are tasked with illustrating the auditory content and determining the optimal visual representation for the said advertisement.
